WSFiZ cultivate an ethos in which you can learn, grow, and succeed. Study at WSFiZ provides an opportunity to practice in another countries. Enjoy one-to-one advice, personal training, group workshops and excellent opportunities throughout your studies.

---

**International Students**

The key objectives of the programs studied at the Department Economic Sciences are: equipping students with state-of-the-art managerial knowledge, developing practical managerial skills, teaching students how economic, social, political and cultural conditions are formed and how they influence the company performance and strategies, and coach students in the skills of creating and strengthening the company competitive superiority. The knowledge of foreign languages, economics, computing and marketing gives an ability to cooperate with businesses all over the World. To help students to achieve these goals, we use of the latest audio-visual materials and the finest foreign and domestic publications.

---

**Career Prospects**

English is increasingly the language of international business and trade. The combination of subject knowledge and good English language skills students develop on the BA & MA programs will give you a distinct advantage in the international job market, either in the EU and world-wide. There are many jobs available for you in business, trade, public service, finance, marketing, management, retailing and the leisure industry. Some of our most successful graduates have even started their own businesses.

Many Bachelor and Master students are motivated by the opportunities of doing trade between their own country and countries in Europe or Asia and our specializations are suited to those students who are intending to work in the field of cross border transactions, management, trade and finance.
